Codebook for Table 8: Crosswalk Between Income/Wage Percentiles and 2015 Dollars

Description

This table provides a crosswalk between parent and child income and wage percentile ranks and dollar values. For each income (or wage) percentile bin, we report the interpolated threshold values, i.e. the interpolated minimum income (or wage) for all people within that bin. We measure all monetary variables in 2015 dollars, adjusting for inflation using the consumer price index (CPI-U). The statistics reported in this table have been cleared by the Census Bureau's Disclosure Review Board release authorization number CBDRB-FY18-319.

Codebook

Variable Name	Description
percentile	Child or parent income percentile rank
kid_hh_income	Mean child household income in 2015 dollars
kid_indiv_income	Mean child individual income in 2015 dollars
